Below is some math.

$\oint_0^{2\pi} x \log x \partial x$

$$\oint_0^2 \pi x \log x \partial x$$

$$\oint_0^{2\pi} x \log x \partial x \tag{1}$$

Above is some more math.

If I want a literal underscore (like_this), I have to escape it, using a backslash (\).

- This is a bulleted list.
- Look, another bullet.

1. This one is numbered.
2. Yay for #2.

new label This one isn't actually numbered...
